Department of Computer Science & Engineering
Project (2026-27)

Functional Requirements Finalization

Project ID: SKIT/CSE/2023-2027/36. **Branch:** CSE **Section:** C

Project Title: JobRix – Ai Powered Intelligent Unified Recruitment Platform.

SDG Mapping: 08 (Write SDG Title) Descent work & Economic Growth.

Project Overview: Provide a brief description of the project (2-3 sentences)

JobRix is an AI-powered unified recruitment platform, it automates resume parsing, ATS scoring and semantic job match using NLP. It provides text & voice AI mock interviews with instant feedback. It offers RAG based career guidance with recruiter analytics

Objectives: Main objectives of the project

1) Objective 1. Implement automated resume parsing using NLP.
2) Objective 2. Build SBERT-based semantic job match & ATS scoring.
3) Objective 3. Develop text & voice based AI mock interview modules.
4) Objective 4. Provide unified dashboards for candidates & recruiters.
5) Objective 5. Implement RAG-based career assistant for personalized guidance.

Functional Requirements:

Detail the specific functional requirements of the project.

ID	Requirement Description	Priority (High/ Medium/Low)
FR-001	User Authentication and role-based access for students and recruiters.	High
FR-002	Automated resume parsing (NLP) and ATS score calculation.	High
FR-003	semantic job matching and recommendation using SBERT.	High

FR-004	AI mock interviews engine with text & voice evaluation.	Medium
FR-005	RAG-based career assistant for study recommendations & analytics.	Medium

Non- Functional Requirements:

Detail the specific functional requirements of the project.

ID	Requirement Description	Priority (High/ Medium/Low)
NFR-001	Resume parsing and matching response time under 3 seconds.	High
NFR-002	Secure data storage and encrypted authentication tokens.	High
NFR-003	Responsive UI compatible with mobile tablet & desktop.	low
NFR-004	scalable database architecture to handle multiple concurrent users	High
NFR-005	High system availability with fallback for external AI APIs.	Medium.

Assumptions and Constraints

1) Assumption 1. Candidates upload valid and readable resumes format (PDF/Docx)
2) Assumption 2. Candidates have working mic/speaker setup for voice interviews
3) Constraint 1. External AI/LLM API rate limits & response latency.
4) Constraint 2. system requires active internet connectivity for model inferences.
