PROBLEM STATEMENT:

Current recruitment platforms primarily focus only on job listings and application management, while resume evaluation, interview preparation and career guidance are handled through separate tools. Recruiters rely on multiple systems for resume screening, interview evaluation, and hiring analytics, increasing manual effort & creating inconsistencies. JobRix unifies resume analysis, analysis of jobs, job matching, AI interviews, and analytics in one single platform countering issues like longer hiring cycles, repetitive effort & limited candidate feedback.

TECHNOLOGY STACK:
