PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in Machine Learning, Python through internships and project work. Comfortable working across the complete development lifecycle, from data preprocessing and model building to deploying web applications. Proficient in Python, C++, Data Structures & Algorithms (250+ problems solved) with experience building scalable software solutions using Django and SQL. Looking for to contribute to impactful products while learning from experienced engineers and growing as a software developer.

EDUCATION

Swami Keshvanand Institute of Technology (SKIT), Jaipur
B.Tech in Computer Science & Engineering

2023 – 2027
CGPA: 9.44/10

Krishna Vidhya Mandir Sr. Sec. School, Alwar
Class XII: **96.60%** — Class X: **96.36%**

TECHNICAL SKILLS

- **Languages:** C++, Python, C, SQL
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, Model Development, Model Evaluation, Cross-Validation, Hyperparameter Tuning
- **Frameworks & Backend:** Django, ORM
- **Databases:** PostgreSQL, MySQL
- **Core CS:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object Oriented Programming
- **Tools:** Git, GitHub, Jupyter Notebook

WORK EXPERIENCE

Data Science Intern

05/2026 | 07/2026

Celebal Technologies, Jaipur

- Automated end-to-end model workflows across 8 weekly assignments from classical ML pipelines to deep learning and GenAI systems reducing manual preprocessing and evaluation time through reusable notebook templates
- Validated feature relationships using statistical tests (ADF, ANOVA, Chi-square) before model selection, improving model reliability and reducing trial-and-error iterations
- Strengthened theoretical understanding of Deep Learning architectures (CNNs, RNNs/LSTMs, RAG)

Machine Learning Intern

06/2025 | 07/2025

Kistechnosoftware Pvt. Ltd.

- Processed and engineered 500K+ records with 20+ features using Pandas and NumPy, improving data quality and model readiness.
- Trained and evaluated multiple ML models using Scikit-learn, completing 10+ assignments and delivering 3 end-to-end pipelines.
- Achieved 85% lab score, highest among 40+ students, demonstrating strong model design and reproducibility.

PROJECTS

ZestBlog — Real-Time Social Blogging Platform

🐙 GitHub | 🌐 Live

Django, PostgreSQL, Redis, Django Channels, Cloudinary, Render

- Orchestrated and deployed a full-stack social blogging platform with 5+ core features (blog publishing, follower system, likes, comments, real-time messaging) using Django Channels and Redis with WebSocket-based architecture.
- Designed scalable backend using Django and PostgreSQL, Optimized feed ranking using a single annotated query (Case/When), efficiently serving 100K+ personalized posts.
- Integrated Cloudinary for persistent media storage and handled Render's ephemeral filesystem, ensuring reliable media management across multiple deployments.
- Modeled asymmetric user relationships using ManyToMany (symmetrical=False) to implement a scalable follower system.

DriveWise — AI-Powered Automotive Assistant

🐙 GitHub | 🌐 Demo

Python, Retrieval-Augmented Generation, Vector Search, Sentence Transformers

- Architected and developed an AI-powered automotive assistant using Retrieval-Augmented Generation (RAG), enabling accurate, context-aware question answering over vehicle brochures through semantic document retrieval.
- Engineered an end-to-end AI pipeline comprising PDF ingestion, intelligent text chunking, embedding generation and LLM-based response generation, delivering low-latency conversational search.
- Implemented a semantic search pipeline using Sentence Transformers and FAISS, enabling low-latency retrieval from unstructured automobile documentation.

CERTIFICATIONS

- **Django Web Development** — GeeksforGeeks
- **NPTEL — Problem Solving through Programming in C**
